

Procedure for requesting photographic materials for large-format printing

The procedure for obtaining authorisation to use Bisazza images is as follows:

- Ask Bisazza (Commercial Office) for the photographs available for this purpose
 - Wait for the Commercial Office to send low-resolution photographs for the preparation of the proof
- Send the complete proof (PDF format) to the Commercial Office
- Wait for the results of validation, to be provided within 7 days

If the proof is not approved:

- The applicant is not authorised to use the low-resolution photographs in any way

If the proof is approved:

- Complete the concession forms (use of the trademark DQ341 and the use of images DQ339) supplied by the Commercial Office and return them by fax
- Wait for e-mail confirmation that the concession has been granted
 - Send a photograph of the materials produced using the photographs requested; failure to do this will result in cancellation of the concession to use the materials

For large-format printing, **the technical characteristics of the image file required must always be stated.**

Authorisation for the use of photographic materials is granted solely for the specified printing job. Each concession form is valid solely for the use of the supplied photographs.

Legal action will be taken in respect of all unauthorised or improper publications of Bisazza images and any improper use of the trademark.

For the legal aspects, see the concession forms covering use of the trademark and the use of images
